

Leap Frog

Rules for Leap Frog:

- All frogs on the left side of the game board must end up on the right side and vice versa.
- There are two legal moves:
- A frog may slide forward only one space at a time.
- A frog may jump forward over any one frog that is one space in front of him.
- Frogs may **never** jump or slide backward.

Set the game up, as shown below, on your game board.

All of the triangles must end up on the right side and all the squares must end up on the left side.

Try to get them to switch places by following the rules above.

If you run in to a problem, talk to a partner at your table and discuss the problem-solving strategies we have talked about in class.
