

SMP	NEEDS IMPROVEMENT	EMERGING	PROFICIENT	EXEMPLARY
MAKES SENSE OF PROBLEMS AND PERSERVER IN SOLVING THEM	<p>Task:</p> <ul style="list-style-type: none"> □ Is strictly procedural. □ Does not require students to check solutions for errors. <p>Teacher:</p> <ul style="list-style-type: none"> □ Does not allow for wait time; asks leading questions to rush through task. □ Does not encourage students to individually process the tasks. □ Is focused solely on answers rather than processes and reasoning. 	<p>Task:</p> <ul style="list-style-type: none"> □ Is overly scaffolded or procedurally “obvious”. □ Requires students to check answers by plugging in numbers. <p>Teacher:</p> <ul style="list-style-type: none"> □ Allots too much or too little time to complete task. □ Encourages students to individually complete tasks, but does not ask them to evaluate the processes used. □ Explains the reasons behind procedural steps. □ Does not check errors publicly. 	<p>Task:</p> <ul style="list-style-type: none"> □ Is cognitively demanding. □ Has more than one entry point. □ Requires a balance of procedural fluency and conceptual understanding. □ Requires students to check solutions for errors using one other solution path. <p>Teacher:</p> <ul style="list-style-type: none"> □ Allows ample time for all students to struggle with task. □ Expects students to evaluate processes implicitly. □ Models making sense of the task (given situation) and the proposed solution. 	<p>Task:</p> <ul style="list-style-type: none"> □ Allows for multiple entry points and solution paths. □ Requires students to defend and justify their solution by comparing multiply solution paths. <p>Teacher:</p> <ul style="list-style-type: none"> □ Differentiates to keep advanced students challenged during work time. □ Integrates time for explicit meta-cognition. □ Expects students to make sense of the task and the proposed solution.
REASON ABSTRACTLY AND QUANTITATIVELY	<p>Task:</p> <ul style="list-style-type: none"> □ Lacks context. □ Does not make use of multiple representations or solution paths. <p>Teacher:</p> <ul style="list-style-type: none"> □ Does not expect students to interpret representations. □ Expects students to memorize procedures with no connection to meaning. 	<p>Task:</p> <ul style="list-style-type: none"> □ Is embedded in a contrived context. <p>Teacher:</p> <ul style="list-style-type: none"> □ Expects students to model and interpret tasks using a single representation. □ Explains connections between procedures and meaning. 	<p>Task:</p> <ul style="list-style-type: none"> □ Has realistic context. □ Requires students to frame solutions in a context. □ Has solutions that can be expressed with multiple representations. <p>Teacher:</p> <ul style="list-style-type: none"> □ Expects students to interpret and model using multiple representations. □ Provides structure for students to connect algebraic procedures to contextual meaning. □ Links mathematical solution with a question’s answer. 	<p>Task:</p> <ul style="list-style-type: none"> □ Has relevant realistic context. <p>Teacher:</p> <ul style="list-style-type: none"> □ Expects students to interpret, model, and connect multiple representations. □ Prompts students to articulate connections between algebraic procedures and contextual meaning.
CONSTRUCT VIABLE ARGUMENT	<p>Task:</p> <ul style="list-style-type: none"> □ Is either ambiguously stated. <p>Teacher:</p> <ul style="list-style-type: none"> □ Does not ask students to present arguments or solutions. □ Expects students to follow a given solution path without opportunities to make conjectures. 	<p>Task:</p> <ul style="list-style-type: none"> □ Is not at the appropriate level. <p>Teacher:</p> <ul style="list-style-type: none"> □ Does not help students differentiate between assumptions and logical conjectures. □ Asks students to present arguments but not to evaluate them. □ Allows students to make conjectures without justification. 	<p>Task:</p> <ul style="list-style-type: none"> □ Avoids single steps or routine algorithms. <p>Teacher:</p> <ul style="list-style-type: none"> □ Identifies students’ assumptions. □ Models evaluation of student arguments. □ Asks students to explain their conjectures. 	<p>Teacher:</p> <ul style="list-style-type: none"> □ Helps students differentiate between assumptions and logical conjectures. □ Prompts students to evaluate peer arguments. □ Expects students to formally justify the validity of their conjectures.
MODEL THE MATHEMATICS	<p>Task:</p> <ul style="list-style-type: none"> □ Requires students to identify variables and to perform necessary computations. <p>Teacher:</p> <ul style="list-style-type: none"> □ Identifies appropriate variables and procedures for students. □ Does not discuss appropriateness of model. 	<p>Task:</p> <ul style="list-style-type: none"> □ Requires students to identify variables and to compute and interpret results. <p>Teacher:</p> <ul style="list-style-type: none"> □ Verifies that students have identified appropriate variables and procedures. □ Explains the appropriateness of model. 	<p>Task:</p> <ul style="list-style-type: none"> □ Requires students to identify variables, compute and interpret results, and report findings using a mixture of representations. □ Illustrates the relevance of the mathematics involved. □ Requires students to identify extraneous or missing information. <p>Teacher:</p> <ul style="list-style-type: none"> □ Asks questions to help students identify appropriate variables and procedures. □ Facilitates discussions in evaluating the appropriateness of model. 	<p>Task:</p> <ul style="list-style-type: none"> □ Requires students to identify variables, compute and interpret results, report findings, and justify the reasonableness of their results and procedures within context of the task. <p>Teacher:</p> <ul style="list-style-type: none"> □ Expects students to justify their choice of variables and procedures. □ Gives students opportunity to evaluate the appropriateness of model.

USE APPROPRIATE TOOLS STRATEGICALLY	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Does not incorporate additional learning tools. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Does not incorporate additional learning tools. 	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Lends itself to one learning tool. <input type="checkbox"/> Does not involve mental computations or estimation. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Demonstrates use of appropriate learning tool. 	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Lends itself to multiple learning tools. <input type="checkbox"/> Gives students opportunity to develop fluency in mental computations. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Chooses appropriate learning tools for student use. <input type="checkbox"/> Models error checking by estimation. 	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Requires multiple learning tools (i.e., graph paper, calculator, manipulatives). <input type="checkbox"/> Requires students to demonstrate fluency in mental computations. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Allows students to choose appropriate learning tools. <input type="checkbox"/> Creatively finds appropriate alternatives where tools are not available.
ATTEND TO PRECISION	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Gives imprecise instructions. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Does not intervene when students are being imprecise. <input type="checkbox"/> Does not point out instances when students fail to address the question completely or directly. 	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Has overly detailed or wordy instructions. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Inconsistently intervenes when students are imprecise. <input type="checkbox"/> Identifies incomplete responses but does not require student to formulate further response. 	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Has precise instructions. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Consistently demands precision in communication and in mathematical solutions. <input type="checkbox"/> Identifies incomplete responses and asks student to revise their response. 	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Includes assessment criteria for communication of ideas. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Demands and models precision in communication and in mathematical solutions. <input type="checkbox"/> Encourages students to identify when others are not addressing the question completely.
LOOK FOR AND MAKE USE OF STRUCTURE	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Requires students to automatically apply an algorithm to a task without evaluating its appropriateness. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Does not recognize students for developing efficient approaches to the task. <input type="checkbox"/> Requires students to apply the same algorithm to a task although there may be other approaches. 	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Requires students to analyze a task before automatically applying an algorithm. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Identifies individual students' efficient approaches, but does not expand understanding to the rest of the class. <input type="checkbox"/> Demonstrates the same algorithm to all related tasks although there may be other more effective approaches. 	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Requires students to analyze a task and identify more than one approach to the Problem. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Facilitates all students in developing reasonable and efficient ways to accurately perform basic operations. <input type="checkbox"/> Continuously questions students about the reasonableness of their intermediate results. 	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Requires students to identify the most efficient solution to the task. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Prompts students to identify mathematical structure of the task in order to identify the most effective solution path. <input type="checkbox"/> Encourages students to justify their choice of algorithm or solution path.
LOOK FOR AND EXPRESS REGULARITY IN REASONING	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Is disconnected from prior and future concepts. <input type="checkbox"/> Has no logical progression that leads to pattern recognition. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Does not show evidence of understanding the hierarchy within concepts. <input type="checkbox"/> Presents or examines task in isolation. 	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Is overly repetitive or has gaps that do not allow for development of a pattern. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Hides or does not draw connections to prior or future concepts. 	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Reviews prior knowledge and requires cumulative understanding. <input type="checkbox"/> Lends itself to developing a pattern or structure. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Connects concept to prior and future concepts to help students develop an understanding of procedural shortcuts. <input type="checkbox"/> Demonstrates connections between tasks. 	<p>Task:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Addresses and connects to prior knowledge in a non-routine way. <input type="checkbox"/> Requires recognition of pattern or structure to be completed. <p>Teacher:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Encourages students to connect task to prior concepts and tasks. <input type="checkbox"/> Prompts students to generate exploratory questions based on current task. <input type="checkbox"/> Encourages students to monitor each other's intermediate results.
