Developing Multiplication Fact Fluency

| Strategy | Description | Examples |
| :---: | :---: | :---: |
| Twos | Double the number. <br> OR <br> This is Doubles from addition! | 2*8 Think: Double 8, so 8+8 is 16 . |
| Fives | Count by fives. <br> OR <br> Multiply by 10 and halve that. | 5*6 Think: $5,10,15,20,25,30$ That's six 5 s so the answer is 30 . OR $10 * 6$ is 60 , half of 60 is 30 . |
| Zero | If I have 0 groups of anything, I always have 0 . Think: The answer is always 0! | 0*5 Think: It's always 0. |
| Ones | If I have 1 group of any number, I just have that number. Think: 1 times any number is that number. | 1*6 Think: It is just the number, so it is 6! |
| Threes | Double plus another. | 3*6 Think: Double 6 is 12, add 6 again, that's 18. |
| Fours | Double and double again. OR <br> Double and then add the double to itself | 4*7 Think: Double 7 is 14 and double 14 is 28 . <br> OR <br> Double 7 is 14 , so 14 and 14 is 28 . |
| Sixes | Triple the number and then double it. <br> OR <br> Multiply by five and add another. | 6*7 Think: $3^{*} 7$ is 21 , double 21 and get <br> 42. <br> OR <br> $5^{*} 7$ is 35 , add another 7 and get 42 . |
| Eights | Double the number three times. | $8^{*} 6$ Think: $2^{*} 6$ is $12,2^{*} 12$ is 24 , and $2 * 24$ is 48 . |
| Nines | Multiply by 10 and subtract the number. <br> OR <br> Think one less than the number, put the new number in the tens place. The ones column is the number that added to the new tens place equals nine. | 9*7 Think: $10 * 7$ is 70 , subtract 7 to get 63 . <br> OR <br> One less than 7 is 6 , so 60 . <br> $6+3$ is 9 so $60+3$ makes 63 . |
| Sevens | Multiply by five and add the double. | $7^{*} 8$ Think: $5^{*} 8$ is $40,2^{*} 8$ is $16,40+16$ is 56. |
